

## TeraCom Services

### Installation and Turnkey Services

TeraCom specialist teams of designers and engineers have unrivalled expertise in all aspects of this demanding field. To our clients, who include major corporations and organisations around the world, we offer a totally flexible portfolio of services designed to address their networking requirements in full. We will survey specify, procure, install, test and support complete network installations as prime contractors or as a turnkey supplier. Our experience includes designing and building local area networks, private and public networks and cable television networks, as well as a variety of transportation communications systems.

Working in partnership with our clients we provide the following services in either a custom-tailored package or a complete turnkey solution:
